-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 March 2005.
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Applicant's election without traverse of Group I-Figures 3-5 in the reply filed on 9/15/2008 is acknowledged.

Claims 24, 26, and 29 have been withdrawn from consideration; and
Claim 20-23, 25, 27-28, and 30-38 are herein addressed below.

Claim 23 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 23, in its entirety is not readily understood by the Examiner. How can the cross-section of the base be "square" or "rectangular" when claim 1 defines the base as a trapezoid?

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 20-23, 25, 27, 28, 30, and 32 (claim 23 as best understood) are rejected under 35 U.S.C. 102(b) as being anticipated by Scott (2,172,091). As shown below, Schott ('091) discloses a plastic/rubber seal having tapered shoulders, a sealing lip, and a base having a trapezoidal solid base.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 31 is rejected under 35 U.S.C. 103(a) as being unpatentable over Scott (2,172,091) in view of Royce et al. (4,233,780). All of the elements of the instant invention are discussed in detail above except providing the seal to have a shore hardness between 40 and 60. Royce et al. (4,233,780) disclose a seal having a shore hardness of 45 (column 2, line 21). It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the seal of Scott ('091) with a shore hardness of 45 as taught by Royce et al. (4,233,780) since the shore hardness of seals

are well known and would have been a matter of design choice. Furthermore, the seal of Scott ('091) would operate equally as well with a shore hardness of 45.

Claims 33-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Scott (2,172,091) in view of Kennedy (5,584,143). All of the elements of the instant invention are discussed in detail above except providing the seal to be mounted on an edge of a double pane glass panel. Kennedy ('143) discloses a double panel glass panel assembly. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the seal of Scott ("091) to be used on a double pane glass assembly as taught by Kennedy ('143) since a double pane glass assembly allows one to see through the panel and still seal the periphery about the glass pane assembly.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Several patents have been cited which disclose the shape and function of the seal as recited by the applicant's invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jerry Redman whose telephone number is 571-272-6835. The examiner can normally be reached on M-TH from 8 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ms. Mitchell, can be reached on 571-272-7069. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
